

I prefer my music commercial free. For that privilage I am will to pay just as I pay for cable television. I need to have traffic and weather updates. These are available on commercial stations at their convience not at mine. Satellite radio gives me everything I need without commercials. Taking that away from me will cause me to get into traffic jams, lose my job since I will be late, be unable to pay taxes, and you will lose your jobs since I can't pay for them anymore.
